Construction Memo: March 8, 2018

Good Morning,

On behalf of the NWSS Replacement Team, I am excited to let you know that the School Replacement Project is moving into the construction phase. We anticipate this phase to begin in the next few weeks.

The first and most noticeable change of this phase, will be the fencing around the new school site and the construction lay down areas. This fencing will require us to adjust some of our daily practice. **We anticipate this fencing to be put in place next week and therefore the NEW PARKING REGULATIONS BEGIN TUESDAY MARCH 13TH, 2018.**

To further ensure student and staff safety, **student drop-off will be off-campus**. A gate has been installed at the front entrance, located at 8th street (at the round-about), limiting access to the parking lot and round-about. The gate will be open during the instructional day for emergency vehicles. The gate will be closed before and after school

Drop Off areas are available along 8th Street and 8th Avenue. We also encourage consideration of student drop off further from the school, with students walking the last portion onto campus.

This move is made to help ensure safety of both students and staff. **Of important note, there will now be one entrance/exit to this parking lot. This entrance is located at 10th Avenue near the Pearson Adult Learning Centre portable. This will be a "right in and right out" system.**

Visitor parking will be located at the small lot currently located off 8th street in front of the library. A limited number of student parking spaces will be available.

Thank you for your cooperation as we move forward in this exciting time for our school. Please see <https://nwss.ca/about-us/school-replacement-project/> recent info

Sincerely,

John Tyler
Principal
